HEAVY DUTY PALLET RACK

Pallet racks are designed in such a way so that industries can easily store pallets on them. They are customisable and can be made according to need of the company.

HEAVY DUTY PANEL RACK

Heavy duty racks are same as pallet racks but have deck panels that facilitates storage of non palletized items that can be stored and handled manually.

MODULAR MEZZANINE FLOOR

Mezzanine floor is platform that creates maximum space for a company to operate in a limited area. It is assembled using nuts & bolts which makes it unique and modular.

CANTILIVER RACKING

Cantilever rack is superior storage solution in many situations. Compared to standard pallet racks, Cantilever racks are easier to use with no front column in the ways. Cantilever Racks are faster to load and unload. Lowering handling time & cost.

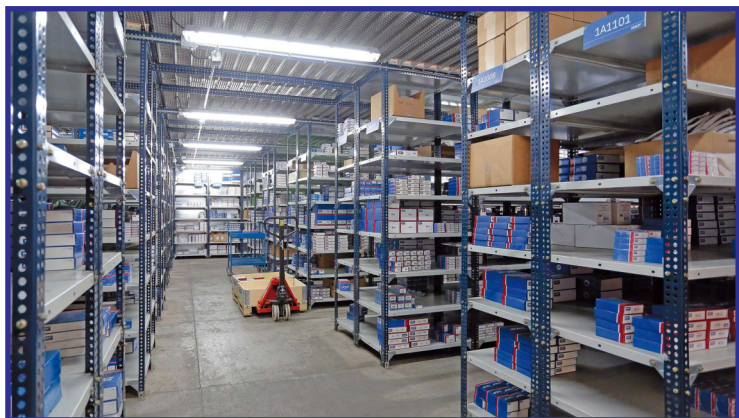

DISPLAY RACK

Display racks as the name suggests are designed for the display of the products. These racks are generally used in shopping areas, supermarket stores or where display of the product is needed.

SLOTTED ANGLE RACKING

Slotted Angle racks are designed for light weighted products and can be made customised according to the need of the customer. It can provide protection to the product by adding back sheet and side sheet to the rack.

CABLE TRAY

Cable trays are very necessary to protect your wires from hazardous situations and also provides a neat and tidy look to your working place. They can vary from size to size and can be customised also.

MOBILE COMPACTORS

Mobile Compactors are designed for use in places where there are limitations on available space. Our range of high quality mobile racks have aisles only on one side. These high storage capacity racks that we manufacture and supply are available in two types: Manual (Push & Pull type), Mechanically operated (chain driven) system.

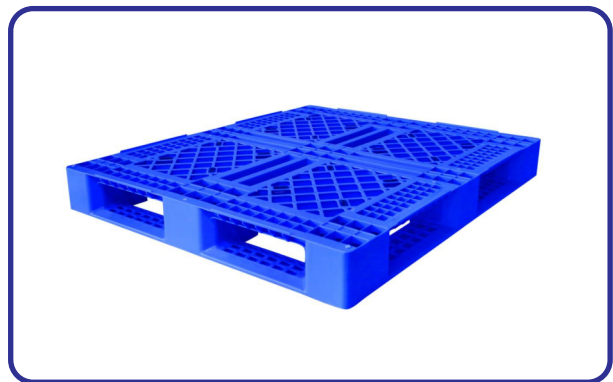

FIFO RACKING

Fifo Racks are another great way to utilize given space in the most efficient ways as it helps in the systematic management of goods. Racks which enhances the storage limit of the store house by multiple folds.

PLASTIC PALLET

Generally use for factories and warehouses Suitable for racking & flat stacking Suitable for electronic & electrical, food & beverage industries, petrochemical industries, etc. Fastening structure, easy to load and unload. Can be tailor-made according to customized requirements. Aesthetically appealing and available in varied colour combinations Configuration of main and add-on modules as per space availability.
